

BE ON THE LOOKOUT FOR

CYANOBACTERIA BLOOMS

LOOK Do you see discoloration or unusual growth?

Cyanobacteria can look like clouds, scum, mats, streaks or clumps along the shore or in the water.

Current cyanobacteria warnings and watches are updated online on the NHDES Healthy Swimming Mapper.

Go online to see current conditions. **CHECK**

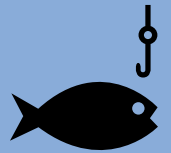

REPORT See a potential bloom? Report it.

Do not wade, swim or let pets in the water near the suspected bloom. Always wash with clean water after any contact.

Check conditions before:

Swimming

Fishing

Boating

Pets
